Italian Mathematics Between the Two World Wars - Angelo Guerraggio 2006-01-20

This book describes Italian mathematics in the period between the two World Wars. It analyzes the development by focusing on both the interior and the external influences. Italian mathematics in that period was shaped by a colorful array of strong personalities who concentrated their efforts on a select number of fields and won international recognition and respect in an incredibly short time. Consequently, Italy was considered a third mathematical power after France and Germany.

National Belongings - Jacqueline Andall 2010

The contributors address the gap in Italian colonial/postcolonial studies by examining how different notions of hybridity can help illuminate the specific nature & circumstances of the Italian colonial & postcolonial condition. Some of the contributors view hybridity as a direct challenge to fixed categorizations.

Le persone nell'impresa. Strumenti e consigli per gestire le risorse umane nell'economia della conoscenza - Rodolfo Buat 2007

Yoga and Multiple Sclerosis - Loren M. Fishman, MD 2007-05-18

Yoga for people with multiple sclerosis? Absolutely! Today, people with a wide range of medical problems use yoga successfully. Because of its emphasis on relaxation, breathing, and deliberate movement, it can be especially beneficial for individuals dealing with a neurologic disease like multiple sclerosis. Yoga and Multiple Sclerosis, coauthored by Dr. Loren Martin Fishman and Eric Small, a yoga teacher who first embraced these techniques as a way to manage his own symptoms of multiple sclerosis, is a comprehensive guide to applying the principles of yoga to the management of MS. The first section is a straightforward but

gentle introduction to yoga - a therapeutic approach to the practice itself. The second part is functionally oriented. Different yoga poses that work toward a common goal, such as combating fatigue, reducing spasticity, and increasing range of motion, are included and illustrated. This user-friendly guide Describes how yoga works Includes photographs and descriptions of each pose Explains effects, advantages, and contraindications Contains starter poses that will help the uninitiated or physically challenged to gently achieve a posture Yoga and Multiple Sclerosis: A Journey to Health and Healing is an excellent guidebook and tool for people with MS, people who undertake yoga on their own, and for all members of the medical and yoga communities.

How to Write a Thesis - Umberto Eco 2015-02-27

Umberto Eco's wise and witty guide to researching and writing a thesis, published in English for the first time. By the time Umberto Eco published his best-selling novel The Name of the Rose, he was one of Italy's most celebrated intellectuals, a distinguished academic and the author of influential works on semiotics. Some years before that, in 1977, Eco published a little book for his students, How to Write a Thesis, in which he offered useful advice on all the steps involved in researching and writing a thesis—from choosing a topic to organizing a work schedule to writing the final draft. Now in its twenty-third edition in Italy and translated into seventeen languages, How to Write a Thesis has become a classic. Remarkably, this is its first, long overdue publication in English. Eco's approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise. How to Write a Thesis is unlike any other writing manual. It reads like a novel. It is opinionated. It is frequently irreverent, sometimes polemical, and often hilarious. Eco advises students how to avoid "thesis neurosis" and he answers the important question "Must You Read Books?" He reminds students "You are not Proust" and "Write everything that comes into your head, but only in the first draft." Of course, there was no Internet in 1977, but Eco's index card research system offers important lessons about critical thinking and information curating for students of today who may be burdened by Big Data. How to Write a Thesis belongs on the bookshelves of students, teachers, writers, and Eco fans everywhere. Already a classic, it would fit nicely between two other classics: Strunk and White and The Name of the Rose. Contents The Definition and Purpose of a Thesis • Choosing the Topic • Conducting Research • The Work Plan and the Index Cards • Writing the Thesis • The Final Draft

Melchiorre Cafà - Alessandra Anselmi 2006

This publication is the first truly collective attempt to study the work of Melchiorre Cafà'. In a variety of studies, it discusses specific and synoptic issues related to his oeuvre. The book also presents a check-list of works by (or attributed to) the artist; this check-list aims at establishing a critical repertory of his oeuvre.

Gender Diversity in European Sport Governance - Agnes Elling 2018-08-06

Gender equality is one of the founding democratic principles of the EU. However, recent studies of the Federation of Olympic Sports in Europe have shown that women occupy only fourteen percent of decision-making positions in sport organizations. This book presents a comprehensive and comparative study of how various regions and countries of Europe have addressed this lack of gender diversity, discussing which strategies have brought about change and to what extent these changes have been successful. With

contributions from leading sport sociologists, covering countries such as Germany, Hungary, Norway, Poland, Spain, Turkey and the UK, it provides a foundation for future policymaking, methodological analyses and theoretical developments that can result in sustainable gender equality in European sport governance. *Gender Diversity in European Sport Governance* is important reading for scholars and students in the fields of sociology of sport, sport management, sociology, gender studies and studies of organization, management and leadership. It is also a valuable resource for policy makers in the EU, as well as national sport organizations and activists.

Destination Branding - Nigel Morgan 2007-06-07

In today's highly competitive market, many destinations - from individual resorts to countries - are adopting branding techniques similar to those used by 'Coca Cola', 'Nike' and 'Sony' in an effort to differentiate their identities and to emphasize the uniqueness of their product. By focusing on a range of global case studies, *Destination Branding* demonstrates that the adoption of a highly targeted, consumer research-based, multi-agency 'mood branding' initiative leads to success every time.

Green Henry - Gottfried Keller 1960

Italian Fascism - R.J.B. Bosworth 2016-07-27

Bringing together scholars from the Italian and English-speaking worlds, Bosworth and Dogliani's edited book reviews the history of the memory and representation of Fascism after 1945. Ranging in their study from patriotic monuments to sado-masochistic films, the essays here collected ask how and why and when Mussolini's dictatorship mattered after the event, and so provide a fascinating study of the relationship between a traumatic past and the changing present and future.

Semiotics of Religion - Robert Yelle 2012-12-20

Integrates structural and historical perspectives on the semiotics of religion and gives an account of the distinctive features of religious language and symbolism.

The Science of Service Systems - Haluk Demirkan 2011-04-20

The Science of Service Systems intends to stimulate discussion and understanding by presenting theory-based research with actionable results. Most of the articles focus on formalizing the theoretical foundations for a science of service systems, examining a wide range of substantive issues and implementations related to service science from various perspectives. From the formal (ontologies, representation specifications, decision-making and maturity models) to the informal (analysis frameworks, design heuristics, anecdotal observations), these contributions provide a snapshot in time of the gradually emerging scientific understanding of service systems. The Science of Service Systems, along with its companion text, *Service Systems Implementation*, is designed to present multidisciplinary and multisectoral perspectives on the nature of service systems, on research and practice in service, and on the future directions to advance service science. These two volumes compose a collection of articles from those involved in the emerging area known as service science.

Qui touring - 2005

The Moon and the Bonfire - Cesare Pavese 2021-07

After 20 years in America, a successful businessman returns to the rustic Piedmontese communities which were riven by fascism. Much has changed since the war, and still more would like to be forgotten and buried. Memories return to the narrator as he looks at the lives and sometimes violent fates of the villagers he has known since childhood, and rediscovers the poverty, ignorance, or indifference that binds them to the hills and valleys against the beauty of the landscape and the rhythm of the seasons. With simple poetic force, Pavese weaves separate strands of narrative together, bringing them to a stark and poignant climax. Part of the new look Peter Owen Modern Classics range featuring a logo crafted by graphic design icon Alvin Lustig.

The Return of Berlusconi - Paolo Bellucci 2002

In 2001, for the first time in the history of the Italian Republic, an opposition replaced the incumbent government as a consequence of an electoral victory. In the May General Election, the center-left government was ousted and a new right-right majority came into office. It would be premature to suggest

that this election represents the birth of a new Italian political system, one that will be based on an ongoing alternation in government between two coalitions and a realignment of voters and parties. Nevertheless, the second Berlusconi government — aside from the various political judgments of it — undoubtedly constitutes an institutional and political novelty. This is not just because the left-left proved unable, in the election campaign, to exploit its achievements in office when confronted with someone with undoubted (if controversial) abilities, but also because of the likely impact of the new government on policy making and Italy's economic, social and international trajectory. This edition of *Italian Politics* evaluates the 2001 election and impact and analyzes the electoral success of the right, the election campaign, the crisis of the left-left after the defeat, and the composition of the new parliament.

Aspectuality - Sarah Dessì Schmid 2019-12-16

This synchronic study presents a new onomasiological, frame-theoretical model for the description, classification and theoretical analysis of the cross-linguistic content category aspectuality. It deals specifically with those pieces of information, which, in their interplay, constitute the aspectual value of states of affairs. The focus is on Romance Languages, although the model can be applied just as well to other languages, in that it is underpinned by a principle grounded in a fundamental cognitive ability: the delimitation principle. Unlike traditional approaches, which generally have a semasiological orientation and strictly adhere to a semantic differentiation between grammatical aspect and lexical aspect (Aktionsart), this study makes no such differentiation and understands these as merely different formal realisations of one and the same content category: aspectuality.

5 Language Visual Dictionary - Dorling Kindersley Publishing, Inc 2003

Labeled drawings provide a wide range of everyday terms from the telephone to human anatomy in English, French, German, Italian, and Spanish.

Religious Narratives in Italian Literature after the Second Vatican Council - Jenny Ponzio 2019-03-18

This book presents a semiotic study of the re-elaboration of Christian narratives and values in a corpus of Italian novels published after the Second Vatican Council (1960s). It tackles the complex set of ideas expressed by Italian writers about the biblical narration of human origins and traditional religious language and ritual, the perceived clash between the immanent and transcendent nature and role of the Church, and the problematic notion of sanctity emerging from contemporary narrative.

Poetics and Rhetoric - Aristotle 2005

The texts of Aristotle's classic studies of drama and oratorical skill are accompanied by an analysis of their contents and an introductory essay.

Animals and Animality in Primo Levi's Work - Damiano Benvegnù 2018-06-21

Situated at the intersection of animal studies and literary theory, this book explores the remarkable and subtly pervasive web of animal imagery, metaphors, and concepts in the work of the Jewish-Italian writer, chemist, and Holocaust survivor Primo Levi (1919-1987). Relatively unexamined by scholars, the complex and extensive animal imagery Levi employed in his literary works offers new insights into the aesthetical and ethical function of testimony, as well as an original perspective on contemporary debates surrounding human-animal relationships and posthumanism. The three main sections that compose the book mirror Levi's approach to non-human animals and animality: from an unquestionable bio-ethical origin ("Suffering"); through an investigation of the relationships between writing, technology, and animality ("Techne"); to a creative intellectual project in which literary animals both counterbalance the inevitable suffering of all creatures, and suggest a transformative image of interspecific community ("Creation").

Greek Medical Papyri - Nicola Reggiani 2019-09-23

The volume collects papers presented at the International Conference "Greek Medical Papyri - Text, Context, Hypertext" held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to "medical texts", contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the

pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the "doctors' context", providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.

Horrific Sufferings of the Mind-Reading Monster Hercules Barefoot - Carl-Johan Vallgren 2007-03-27

Horrific Sufferings of the Mind-Reading Monster Hercules Barefoot is the picaresque fable of the love that grows between the mute, telepathic human monstrosity Hercules and the beautiful Henriette—a love that will entwine their fates forever. Author Carl-Johan Vallgren creates an unforgettable cast of grotesqueries in a magical and atmospheric tour of nineteenth-century Europe—from the bordello, where Hercules is born, to the squalor of the asylum, where he finds only pain, to the sinister grandeur of the Jesuit monasteries in which he finds both shelter and peril, to the phantasmagoria of the freak show with which he travels. A moving, uplifting, at times dark and macabre tale of social oppression, official corruption, religious persecution, and unwavering devotion, it is a story that enchants and surprises . . . and leaves one wide-eyed with wonder, like a small child at his first carnival.

The Turin Shroud - G. Fanti 2008

The aim of this work is to summarise the important contribution furnished by Optics in the studies of the TS (Turin Shroud) made in more than a century of researches and tests. In the first section the very peculiar characteristics of the TS are presented and discussed showing that up to now the double body image impressed on it is not yet reproducible. Some body image formation hypotheses are presented and they will be tested by also means of optical means successively discussed. The second and third sections respectively present the most important optical researches done in the past and in the present in reference to the Relic and the fourth section discusses some possible optical studies that should be done on the TS to unveil some obscure points. It is also accounted for the conservation problems that are very important for the body image impressed in the linen Cloth in a very particular way.

Impresa, lavoro e non lavoro nell'economia digitale - Alessi Cristina 2019-08-05

Questo volume raccoglie gli atti del Convegno sul tema "Impresa, lavoro e non lavoro nell'economia digitale", svoltosi presso l'Università di Brescia nell'ottobre del 2017 e organizzato dal "Gruppo d. Lavoro" (che riunisce giuriste e giuristi del lavoro delle università di Brescia, Bologna, Cagliari, Cassino, Catania, Catanzaro, Ferrara, Firenze, Foggia, Genova, Milano Bicocca, Milano Statale, Molise, Pescara, Reggio Calabria, Roma Tre, Siena, Trento, Urbino, Venezia, Verona), in collaborazione con l'OSMER (Osservatorio sul mercato del lavoro e sulle relazioni collettive) dell'Università di Brescia. Il convegno ha fornito l'occasione per riflettere sui cambiamenti epocali indotti dalla rivoluzione digitale e sulla loro accelerazione esponenziale, a partire dalla prima metà del decennio del nuovo secolo, che li ha portati a riscrivere profondamente i sistemi produttivi e anche gli stili di vita contemporanei. I temi del convegno riguardano il lavoro dell'economia digitale (le trasformazioni prodotte dall'industria 4.0; il telelavoro e il lavoro agile, che modificano le tradizionali coordinate spazio-temporali della prestazione ben oltre il tradizionale lavoro a distanza; la sharing economy e il platform work), ma pure la scomparsa del lavoro o la sua diffusa precarizzazione, anche nella forma dell'auto-impresa e/o del lavoro free lance.

Thinking Italian Translation - Sándor G. J. Hervey 2000

A comprehensive and practical course teaching Italian-English translation skills, this text focuses on ways of improving translation quality and also gives clear definitions of translation theories. The book also includes original texts from a range of sources.

John Florio: The Life of an Italian in Shakespeare's England - Frances A. Yates 2011-04-14

John Florio is best known to the present day for his great translation of Montaigne's Essays. To his contemporaries he was one of the most conspicuous figures of the literary and social cliques of the time. By her reconstruction of Florio's life and character, Frances Yates' 1934 text throws light upon the vexed question of his relations with Shakespeare.

Simplicity - Alain Berthoz 2018-12-20

"Simplicity, as I understand it, is the range of solutions living organisms have found, despite the complexity of natural processes, to enable the brain to prepare an action and plan for the consequences of it. These

solutions are simplifying principles that enable the processing of information or situations, by taking into account past experience and anticipating the future. They are neither caricatures, shortcuts, or summaries. They are new ways of asking questions, sometimes at the cost of occasional detours, in order to achieve faster, more elegant, more effective actions." A. B. As Alain Berthoz demonstrates in this profoundly original book, simplicity is never easy; it requires suppressing, selecting, connecting, thinking, in order to then act in the best way possible. And what if we, in turn, are inspired by the living world to process the complexity that surrounds us? Alain Berthoz is professor at the Collège de France where he is co-director of the Laboratoire de physiologie de la perception et de l'action. [Laboratory for the physiology of perception and action]. He is a member of the French Academy of Sciences, and is the author of *Le Sens du mouvement* [The Brain's Sense of Movement] and *La Décision* [Emotion and Reason].

Event and Result Nominals - Chiara Melloni 2011

The syntax and semantics of deverbal action nominals, notoriously ambiguous between event and result interpretation, have been a thought-provoking issue in many areas of theoretical linguistics. This volume contributes to current work on this topic by showing how the analysis of these nouns can benefit from a morphological and lexical-semantic treatment.
 While being a revealing synthesis of a number of formal accounts on this popular research domain, this study specifically targets the largely unexplored area of result nouns and addresses several crucial issues. What are result nouns in a strictly lexical-semantic perspective? Why do some verb classes allow ambiguous event/result nominal correlates, while others do not? What are the relevant verbal features involved in result noun formation? Is there a range of predictability in the number and types of meaning conveyed by a derived nominal?
 Couched within a framework of decompositional lexical semantic, the analysis offers original formal solutions to the polysemy issues arising in this word formation domain and convincingly argues in favor of the semantic alignment between the morphologically simplex and complex lexicon. A compelling range of Italian data provides empirical support to the author's claims.

Bilingual Minds - Aneta Pavlenko 2006-03-09

Do bi- and multilinguals perceive themselves differently in their respective languages? Do they experience different emotions? How do they express emotions and do they have a favourite language for emotional expression? How are emotion words and concepts represented in the bi- and multilingual lexicons? This ground-breaking book opens up a new field of study, bilingualism and emotions, and provides intriguing answers to these and many related questions.

Room 24 - Katie Prejean McGrady 2016-02-05

Five years after she graduated from high school, teacher, youth minister, and sought-after speaker Katie Prejean McGrady returned to her alma mater in Lake Charles, Louisiana, to teach freshman theology. In the early years of her career, McGrady's hormonal, sometimes grumpy, and often confused students taught her what it means to evangelize. Her frequently witty and always candid stories—and the ten lessons she offers—will inspire anyone who works with youth in the Church today. As she began her first year of teaching, McGrady was eager to impart the Catholic doctrine she loves to her class in room 24 at St. Louis Catholic high school, but she was quickly rattled by the magnitude of the task, especially when she was challenged by a teen who said he didn't believe. In ten brief and compelling chapters, McGrady shares humorous and hopeful interactions she's had with her students that helped her learn that teaching them about Jesus and his Church is not as important as knowing them, loving them, and inviting them to know and love Jesus as a personal friend and savior. Her frequent mistakes and occasional successes with her students taught McGrady how to evangelize young people by building relationships in joyful, humble, and prayerful ways. Likewise, McGrady determined that the power of inviting conversation, welcoming questions, and witnessing to faith through personal stories engages students and helps them fall in love with Jesus.

Peter Waring - Forrest Reid 2011-09-15

Peter Waring (1937) is a full-scale revision of Reid's earlier *Following Darkness* (1912) in which Peter, a sensitive boy with literary inclinations, grows up unhappily in the household of his father, a cold village schoolmaster in Newcastle, County Down, and among his Belfast relatives whom he finds intolerable. 'An acute and subtle story of adolescence.... A delicacy and a grave beauty which make their own quiet appeal.'

Times 'Reid has written one of the finest studies of the mental, sexual, spiritual life of the adolescent without ever mentioning the words.' Glasgow Herald

Eternal War - Armies of Saints - Livio Gambarini 2015-07-26

In 13th century Florence, the war between the Guelphs and Ghibellines is destroying entire families. Every corner of Tuscany has been drawn into the conflict, but little do the two sides realise their war is but a pale reflection of a battle between the mysterious inhabitants of the spirit world, lasting a thousand years. The spirit that guides the Cavalcanti family, Kabal, uses every any means at his disposal to make sure his family is not torn to shreds and eventually comes out on top. The true ace up his sleeve is the new head of his family, the warrior and poet Guido Cavalcanti. Guido is driven to seek an impossible peace as he strives to save his city and marry the girl he loves. He is helped by a young, exceptionally shy poet known as Dante Alighieri... It is a story of war, betrayal, intrigue and magic that is woven skilfully together to create a wondrous combination of historical accuracy and the fantastic world that lies behind human endeavour. "The Eternal War - Armies of Saints" is an innovative historical fantasy set against the backdrop of the Florence of the Divine Comedy. It has already conquered Italy and now, with the English translation, it is set to take the world.

The Road of Dreams - Bruce B. Junek 1991

[The Man I Pretend to Be](#) - Guido Gozzano 2014-07-14

Translated here in a bilingual edition is Gozzano's best and best-known collection of poems, *The Colloquies*, along with a selection of his other poems. Also included is an introductory essay by Eugenio Montale, the Italian poet and winner of the 1975 Nobel Prize for Literature. Originally published in 1981. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The

goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

[Six Memos for the Next Millennium](#) - Italo Calvino 2013-04-04

Italo Calvino was due to deliver the Charles Eliot Norton lectures at Harvard in 1985-86, but they were left unfinished at his death. The surviving drafts explore of the concepts of Lightness, Quickness, Multiplicity, Exactitude and Visibility (Constancy was to be the sixth) in serious yet playful essays that reveal Calvino's debt to the comic strip and the folktale. With his customary imagination and grace, he sought to define the virtues of the great literature of the past in order to shape the values of the future. This collection is a brilliant précis of the work of a great writer whose legacy will endure through the millennium he addressed. Italo Calvino, one of Italy's finest postwar writers, has delighted readers around the world with his deceptively simple, fable-like stories. Calvino was born in Cuba in 1923 and raised in San Remo, Italy; he fought for the Italian Resistance from 1943-45. His major works include *Cosmicomics* (1968), *Invisible Cities* (1972), and *If on a winter's night a traveler* (1979). He died in Siena in 1985, of a brain hemorrhage.

A Brief History of Numbers - Leo Corry 2015-08-27

The world around us is saturated with numbers. They are a fundamental pillar of our modern society, and accepted and used with hardly a second thought. But how did this state of affairs come to be? In this book, Leo Corry tells the story behind the idea of number from the early days of the Pythagoreans, up until the turn of the twentieth century. He presents an overview of how numbers were handled and conceived in classical Greek mathematics, in the mathematics of Islam, in European mathematics of the middle ages and the Renaissance, during the scientific revolution, all the way through to the mathematics of the 18th to the early 20th century. Focusing on both foundational debates and practical use numbers, and showing how the story of numbers is intimately linked to that of the idea of equation, this book provides a valuable insight to numbers for undergraduate students, teachers, engineers, professional mathematicians, and anyone with an interest in the history of mathematics.
