Consilience - E. O. Wilson 2014-11-26

"A dazzling journey across the sciences and humanities in search of deep

laws to unite them." --The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*--gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant "jumping together"), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

[Mastering 'Metrics](#) - Joshua D. Angrist 2014-12-21

An accessible and fun guide to the essential tools of econometric research Applied econometrics, known to aficionados as 'metrics, is the original data science. 'Metrics encompasses the statistical methods economists use to untangle cause and effect in human affairs. Through accessible discussion and with a dose of kung fu-themed humor,

Mastering 'Metrics presents the essential tools of econometric research

and demonstrates why econometrics is exciting and useful. The five most valuable econometric methods, or what the authors call the Furious Five--random assignment, regression, instrumental variables, regression discontinuity designs, and differences in differences--are illustrated through well-crafted real-world examples (vetted for awesomeness by Kung Fu Panda's Jade Palace). Does health insurance make you healthier? Randomized experiments provide answers. Are expensive private colleges and selective public high schools better than more pedestrian institutions? Regression analysis and a regression discontinuity design reveal the surprising truth. When private banks teeter, and depositors take their money and run, should central banks step in to save them? Differences-in-differences analysis of a Depression-era banking crisis offers a response. Could arresting O. J. Simpson have saved his ex-wife's life? Instrumental variables methods instruct law enforcement authorities in how best to respond to domestic abuse. Wielding econometric tools with skill and confidence, Mastering 'Metrics uses data and statistics to illuminate the path from cause to effect. Shows why econometrics is important Explains econometric research through humorous and accessible discussion Outlines empirical methods central to modern econometric practice Works through interesting and relevant real-world examples

Deconstructing Martial Arts - Paul Bowman 2019-06-24

What is the essence of martial arts? What is their place in or relationship with culture and society? Deconstructing Martial Arts analyses familiar issues and debates that arise in scholarly, practitioner and popular cultural discussions and treatments of martial arts and argues that martial arts are dynamic and variable constructs whose meanings and values regularly shift, mutate and transform, depending on the context. It argues that deconstructing martial arts is an invaluable approach to both the scholarly study of martial arts in culture and society and also to wider understandings of what and why martial arts are. Placing martial arts in relation to core questions and concerns of media and cultural studies around identity, value, orientalism, and embodiment, Deconstructing Martial Arts introduces and elaborates deconstruction as

a rewarding method of cultural studies.

[Story in Children's Lives: Contributions of the Narrative Mode to Early Childhood Development, Literacy, and Learning](#) - Kelli Jo Kerry-Moran 2019-09-27

This book is based on the power of stories to support children in all areas of their lives. It examines the role narratives can play in encouraging growth in contexts and domains such as personal and family identity, creative movement, memory and self-concept, social relationships, or developing a sense of humor. Each chapter describes innovative and research-based applications of narratives such as movement stories, visual narratives to develop historical thinking, multimodal storytelling, bibliotherapy, mathematics stories, family stories, and social narratives. The chapters elaborate on the strength of narratives in supporting the whole child in diverse contexts from young children on the autism spectrum improving their social skills at school, to four- and five-year-olds developing historical thinking, to children who are refugees or asylum-seekers dealing with uncertainty and loss. Written by accomplished teachers, researchers, specialists, teaching artists and teacher educators from several countries and backgrounds, the book fills

a gap in the literature on narratives. "...this work delves into the topic of narratives in young children's lives with a breadth of topics and depth of study not found elsewhere." "Collectively, the insights of the contributors build a convincing case for emphasizing story across the various disciplines and developmental domains of the early childhood years."

"The writing style is scholarly, yet accessible. Authors used a wide array of visual material to make their points clearer and show the reader what meaningful uses of story "look like"." Mary Renck Jalongo, Journal and Book Series Editor Springer Indiana, PA, USA

The Work of the Dead - Thomas W. Laqueur 2015-10-13

The meaning of our concern for mortal remains—from antiquity through the twentieth century The Greek philosopher Diogenes said that when he died his body should be tossed over the city walls for beasts to scavenge. Why should he or anyone else care what became of his corpse? In *The Work of the Dead*, acclaimed cultural historian Thomas Laqueur examines why humanity has universally rejected Diogenes's argument. No culture has been indifferent to mortal remains. Even in our supposedly disenchanted scientific age, the dead body still matters—for individuals, communities, and nations. A remarkably ambitious history, *The Work of the Dead* offers a compelling and richly detailed account of how and why the living have cared for the dead, from antiquity to the twentieth century. The book draws on a vast range of sources—from mortuary archaeology, medical tracts, letters, songs, poems, and novels to painting and landscapes in order to recover the work that the dead do for the living: making human communities that connect the past and the future. Laqueur shows how the churchyard became the dominant resting place of the dead during the Middle Ages and why the cemetery largely supplanted it during the modern period. He traces how and why since

the nineteenth century we have come to gather the names of the dead on great lists and memorials and why being buried without a name has become so disturbing. And finally, he tells how modern cremation, begun as a fantasy of stripping death of its history, ultimately failed—and how even the ashes of the victims of the Holocaust have been preserved in culture. A fascinating chronicle of how we shape the dead and are in turn shaped by them, this is a landmark work of cultural history.

Lightning Protection of Aircraft - Franklin Fisher 2012-07-13

This book is an attempt to present under one cover the current state of knowledge concerning the potential lightning effects on aircraft and that means that are available to designers and operators to protect against these effects. Swahili Language Handbook - Edgar C. Polomé 1967

Field Programmable Logic and Applications - Patrick Lysaght 2004-06-22

This book contains the papers presented at the 9th International Workshop on Field Programmable Logic and Applications (FPL'99), hosted by the University of Strathclyde in Glasgow, Scotland, August 30 - September 1, 1999. FPL'99 is the ninth in the series of annual FPL workshops. The FPL'99 programme committee has been fortunate to have received a large number of high-quality papers addressing a wide range of topics. From these, 33 papers have been selected for presentation at the workshop and a further 32 papers have been accepted for the poster sessions. A total of 65 papers from 20 countries are included in this volume. FPL is a subject area that attracts researchers from both electronic engineering and computer science. Whether we are engaged in research into software or hardware seems to be primarily a question of perspective. What is unquestionable

is that the interaction of groups of researchers from different backgrounds results in stimulating and productive research. As we prepare for the new millennium, the premier European forum for researchers in field programmable logic remains the FPL workshop. Next year the FPL series of workshops will celebrate its tenth anniversary. The contribution of so many overseas researchers has been a particularly attractive feature of these events, giving them a truly international perspective, while the informal and convivial atmosphere that pervades the workshops have been their hallmark. We look forward to preserving these features in the future while continuing to expand the size and quality of the events.

Extinct Animals: An Encyclopedia of Species that Have

Disappeared during Human History - Ross Piper 2009-03-20

Everyone is familiar with the dodo and the woolly mammoth, but how many people have heard of the scimitar cat and the Falkland Island fox? Extinct Animals portrays over 60 remarkable animals that have been lost forever during the relatively recent geological past. Each entry provides a concise discussion of the history of the animal—how and where it lived, and how it became extinct—as well as the scientific discovery and analysis of the creature. In addition, this work examines what led to extinction—from the role of cyclical swings in the Earth's climate to the spread of humans and their activities. Many scientists believe that we are in the middle of a mass extinction right now, caused by the human undermining of the earth's complex systems that support life.

Understanding what caused the extinction of animals in the past may help us understand and prevent the extinction of species in the future.

Extinct Animals examines the biology and history of some of the most interesting creatures that have ever lived, including: The American Terror Bird, which probably became extinct over 1 million years ago, who were massive predators, some of which were almost 10 feet tall; the Rocky Mountain Locust, last seen in 1902, formed the most immense animal aggregations ever known, with swarms estimated to include over 10 trillion insects; the Giant Ground Sloth, which was as large as an elephant; and the Neandertals, the first Europeans, which co-existed

with prehistoric Homo sapiens. Extinct Animals includes illustrations—many created for the work—that help the reader visualize the extinct creature, and each entry concludes with a list of resources for those who wish to do further research.

British Women Film Directors in the New Millennium - Stella Hockenull 2017-04-27

This book focuses on the output of women film directors in the period post Millennium when the number of female directors working within the film industry rose substantially. Despite the fact that nationally and internationally women film directors are underrepresented within the industry, there is a wealth of talent currently working in Britain. During the early part of the 2000s, the UKFC instigated policies and strategies for gender equality and since then the British Film Institute has continued to encourage diversity. British Women Directors in the New Millennium therefore examines the production, distribution and exhibition of female directors' work in light of policy. The book is divided into two sections: part one includes a historical background of women directors working in the twentieth century before discussing the various diversity funding opportunities available since 2000. The second part of the book examines the innovation, creativity and resourcefulness of British female film directors, as well as the considerable variety of films that they produce, selecting specific examples for analysis in the process.

Development of the Global Film Industry - Qiao Li 2020-09-01

The global film industry has witnessed significant transformations in the past few years. Regions outside the USA have begun to prosper while non-traditional production companies such as Netflix have assumed a larger market share and online movies adapted from literature have continued to gain in popularity. How have these trends shaped the global film industry? This book answers this question by analyzing an increasingly globalized business through a global lens. Development of the Global Film Industry examines the recent history and current state of the business in all parts of the world. While many existing studies focus on the internal workings of the industry, such as production, distribution and screening, this study takes a "big picture" view, encompassing the transnational integration of the cultural and entertainment industry as a whole, and pays more attention to the coordinated development of the film industry in the light of influence from literature, television, animation, games and other sectors. This volume is a critical reference for students, scholars and the public to help them understand the major trends facing the global film industry in today's world.

Handing Down the Light - Fu Chi-Ying 2004

Now in its third edition in English, Handing Down the Light, the inspirational biography of Venerable Master Hsing Yun, traces the extraordinary life and mission of one of the most influential spiritual leaders in the world today. It takes us back to the humble beginnings of a young and resilient Buddhist monastic in mainland China, who fortified his faith and strengthened his resolve to spread the Dharma under the most trying circumstances. In doing so, it sheds light on the indomitable spirit that distinguished Master Hsing Yun even at a young age. It is this same spirit that compelled the young charismatic monastic to cross the strait in 1949, bearing the light of Buddhism to Taiwan. Handing Down the Light not only offers an inspirational account of how Master Hsing Yun was able to overcome one adversity after another, but also illuminates the causes and conditions that allowed Buddhism to gain a firm foothold in Taiwan after decades of his efforts to propagate the Dharma and establish centers of education. This same vision and commitment led Master Hsing Yun to extend Humanistic Buddhism first to North America and then to all corners of the world. In essence, Handing Down the Light can be read as a comprehensive account of the building of a global Buddhist community. Full of lively anecdotes, penetrating insights and rich visual documentation that celebrate the lifetime vision and accomplishments of Master Hsing Yun, Handing Down the Light is a biography that itself transmits the "light" of an exemplary spiritual leader for the 21st century.
