Luftwaffe Fighter Aces - Mike Spick 2011-07-19

In this exciting book Mike Spick shows how the Luftwaffe's leading fighter pilots were able to outscore their allied counterparts so effectively and completely during the Second World War. When the records of the Jagdflieger pilots became available after the war, they were initially greeted with incredulity _ the highest claim was for 352 kills, and more than 100 pilots had recorded more than 100 victories. However postwar research proved that these claims had in fact been made in good faith and confirmation had only been given after rigorous checking. To discover the secret of this success, aviation history expert Mike Spick examines the exploits of these aces and sets out the context in which it took place. Every major theater is covered in detail including the conditions peculiar to each: climate, relative numerical and qualitative strengths, the presence or absence of radar and other measures, and the relative merits of the planes being flown. He focuses on the methods and tactics used by individual aces and uses firsthand sources wherever possible to put the reader right alongside the pilot in the cockpit.

Russian Cultural Anthropology After the Collapse of Communism - Альберт Кашфуллович Байбурин 2012

In Soviet times, anthropologists in the Soviet Union were closely involved in the state's work of nation building. They helped define official nationalities, and gathered material about traditional customs and suitably heroic folklore, whilst at the same time refraining from work on the reality of contemporary Soviet

life. Since the end of the Soviet Union anthropology in Russia has been transformed. International research standards have been adopted, and the focus of research has shifted to include urban culture and difficult subjects, such as xenophobia. However, this transformation has been, and continues to be, controversial, with, for example, strongly contested debates about the relevance of Western anthropology and cultural theory to post-Soviet reality. This book presents an overview of how anthropology in Russia has changed since Soviet times, and showcases examples of important Russian anthropological work. As such, the book will be of great interest not just to Russian specialists, but also to anthropologists more widely, and to all those interested in the way academic study is related to prevailing political and social conditions.

Room 24 - Katie Prejean McGrady 2016-02-05

Five years after she graduated from high school, teacher, youth minister, and sought-after speaker Katie Prejean McGrady returned to her alma mater in Lake Charles, Louisiana, to teach freshman theology. In the early years of her career, McGrady's hormonal, sometimes grumpy, and often confused students taught her what it means to evangelize. Her frequently witty and always candid stories—and the ten lessons she offers—will inspire anyone who works with youth in the Church today. As she began her first year of teaching, McGrady was eager to impart the Catholic doctrine she loves to her class in room 24 at St. Louis Catholic high school, but she was quickly rattled by the magnitude of the task, especially when she was challenged by a teen who said he didn't believe. In ten brief and compelling chapters, McGrady shares humorous and hopeful interactions she's had with her students that helped her learn that teaching them about Jesus and his Church is not as important as knowing them, loving them, and inviting them to know and love Jesus as a personal friend and savior. Her frequent mistakes and occasional successes with her students taught McGrady how to evangelize young people by building relationships in joyful, humble, and prayerful ways. Likewise, McGrady determined that the power of inviting conversation, welcoming questions, and witnessing to faith through personal stories engages students and helps them fall in love with Jesus.

Historical Atlas of Medieval Music - Vera Minazzi 2019-08-31

Music is rooted in the heart of Western culture. The absence of music from the usual publications of medieval history and history of art of the Middle Ages is understandable, considering the rarity of sources. And yet, throughout the last decades, an intense activity of historico-musicological research has been carried out internationally by a select group of specialized scholars. The ambitious goal of this work is to set medieval music within its historical and cultural context and to provide readers interested in different disciplines with an overall picture of music in the Middle Ages; multi-faceted, enjoyable, yet scientifically rigorous. To achieve this goal, the most prominent scholars of medieval musicology were invited to participate, along with archaeologists, experts of acoustics and architecture, historians and philosophers of medieval thought. The volume offers exceptional iconography and several maps, to accompany the reader in a fascinating journey through a network of places, cultural influences, rituals and themes.

Immunotherapy - Aung Naing 2022-01-01

The field of immuno-oncology continues to rapidly evolve as new insights to fight and treat cancer emerge. The fourth edition of Immunotherapy provides the most current overview of immuno-oncology in different cancer types and toxicities associated with immunotherapy. While immunotherapy has revolutionized the treatment landscape of several solid malignancies, several challenges still exist. Only a subset of patients derive clinical benefits; some do not respond at all, and others respond initially, only for their disease to progress later. Because these drugs can activate a broad range of immune cells, patients suffer from a unique set of side effects known as immune-related adverse events. As more immunotherapeutic agents are used in the clinic, it is important to provide updates about current and ongoing developments in the field to further research efforts and inform treatment decisions. The fourth edition will have a new focus on strategies to overcome the challenges associated with immunotherapy. Chapters will discuss topics such as biomarkers of response, resistance mechanisms, role of imaging in predicting immune-related adverse events, and management of immune-related adverse events. Written by leading experts conducting cutting-edge research, readers will gain up-to-date knowledge on the current state and future of immunotherapy.

Homo Sapiens - University Press 2020-06-17

University Press returns with another short and captivating book - a brief history of our human species: Homo sapiens. All the humans who ever lived are extinct - except for Homo sapiens. We are, in Latin, the "wise humans." We are the sole survivors of a long and deadly battle against the forces of nature and time. The first humans - hominids - diverged from the other primates and began to walk upright on two legs some

3 million years ago. The first "modern" humans - Homo sapiens - diverged from the other hominids some 250,000 years ago. Since then, modern humans and our big brains migrated out of Africa, developed the capacity for language, domesticated animals, became farmers, learned to write, got religious, built cities, invented money, expanded empires, harnessed the scientific method, tried enlightenment, challenged authority, created machines, conquered the air, weaponized the atom, eliminated disease, walked on the moon, did the internet, made artificial intelligence, fed seven billion people, and speculated about the future of our species. This short book provides a captivating account of the noble, savage, sacred, mundane, heroic and heart-warming events that connect us with our earliest ancestors - an account that you can read in about an hour.

This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. Rivista della beneficenza pubblica e delle istituzioni di previdenza - 1889

Repertorio generale della Giurisprudenza italiana - 1994

The School and Society - John Dewey 1915

First published in 1899, "The School and Society" describes John Dewey's experiences with his own famous Laboratory School, started in 1896. Dewey's experiments at the Laboratory School reflected his original social and educational philosophy based on American experience and concepts of democracy, not on European education models then in vogue. This forerunner of the major works shows Dewey's pervasive concern with the need for a rich, dynamic, and viable society. In his introduction to this volume, Joe R. Burnett states Dewey's theme. Industrialization, urbanization, science, and technology have created a revolution the schools cannot ignore. Dewey carries this theme through eight chapters: The School and Social Progress; The School and the Life of the Child; Waste in Education; Three Years of the University Elementary School; The Psychology of Elementary Education; Froebel's Educational Principles; The Psychology of Occupations; and the Development of Attention.

Compasito - Nancy Flowers 2007-01-01

Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this

natural interest and learning process. This is what human rights education is about and this is what 'Compasito manual on human rights education for children' is for. 'Compasito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence. The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.

From Slavery to Aid - Benedetta Rossi 2015-08-25

From Slavery to Aid engages two major themes in African historiography, the slow death of slavery and the evolution of international development, and reveals their interrelation in the social history of the region of Ader in the Nigerien Sahel. Benedetta Rossi traces the historical transformations that turned a society where slavery was a fundamental institution into one governed by the goals and methods of 'aid'. Over an impressive sweep of time - from the pre-colonial power of the Caliphate of Sokoto to the aid-driven governments of the present - this study explores the problem that has remained the central conundrum throughout Ader's history: how workers could meet subsistence needs and employers fulfil recruitment requirements in an area where natural resources are constantly exposed to the climatic hazards characteristic of the edge of the Sahara.

Thirty Years of Community Law - Commission of the European Communities 1983

"More than 30 years have elapsed since Robert Schuman's declaration of 9 May 1950 and the signature on 18 April 1951 of the Treaty of Paris establishing the European Coal and Steel Community. The time has come for the European Community to take stock. Both as a unique economic and human experiment, and as a reality endowed with powerful legal instruments, this singular phenomenon needs to be examined from the standpoint of history. The establishment of the Community was completed with the conclusion of the Treaties of Rome creating the European Economic Community and the European Atomic Energy Community. Its institutions have undergone several stages of development, including the merger of the executives, the creation of own resources, the extension of Parliament's budgetary powers and the creation of a Court of Auditors. At the same time the Community was putting into effect the fundamental principles of free movement of goods, persons, services and capital, and developing the common policies which are laid down in the Treaties or which proved necessary in order to attain, in the course of the operation of the common market, one of the objectives of the Community. On two occasions it has been enlarged by the accession of further European States, first Denmark, Ireland and the United Kingdom, and subsequently

Greece. It has also commenced negotiations with a view to the admission of Spain and Portugal. The progress made by the Community is reflected in a vast range of legislation binding on Member States, firms and individuals, and in the body of case-law built up by the Court of Justice in Luxembourg. The Commission wished to provide a work of reference for lawyers which did not assume any familiarity with questions of Community law. It asked eminent specialists in the subject from the various Member States to make individual contributions to Thirty years of Community law so as to trace the development of the Community, summarize the progress achieved in the various sectors and examine the difficulties which the Community has had to face. Each author was allowed the fullest freedom of expression. Neither the Commission nor readers will necessarily share all the points of views expressed, but they will at least have the benefit of a full and frank discussion"--Unedited summary from book cover.
