Leeds - John Edwards 2014-11-06

Leeds, sited in the heart of West Yorkshire, is the UK's third largest city and is home to a community rich in history, ambition and achievement. As the financial, cultural and commercial heart of West Yorkshire, Leeds is a city essential to the global economic system.

Although only a small borough for much of its existence, Leeds in the seventeenth and eighteenth centuries became a key centre for the production and trading of wool. As the Industrial Revolution progressed, Leeds developed into a major industrial hub, extending its reach into engineering, printing, commerce, health and education. Iron foundries were among other industries of extreme importance. The city then expanded, absorbing many of the surrounding villages and townships to become the urban city we see today. Combining cultural riches with strong transport and communication links, it continues to attract students, entrepreneurs and professionals, not only to visit, but often to relocate to this vibrant part of West Yorkshire. The authors have charted the area's great past, and the enormous changes that have taken place, through a selection of fascinating and inspiring old postcards.

The Postcard - Laura V. Hilton 2015-03-10

Rachel Miller dreams of traveling beyond her mundane existence in Jamesport, Missouri. To satisfy her wanderlust, she sends letters to people she reads about in the Budget, the Amish newspaper, and asks that they consider mailing her a simple postcard in return. Her collection of correspondence from various Amish communities isn't as exciting as traveling, but it keeps her occupied. One of her regular communicants is David Lapp, of Seymour, Missouri, and she soon feels as if he knows her better than her own beau, Obadiah. Too bad she is already promised to marry him. Originally from Lancaster, Pennsylvania, David Lapp moved to Seymour, Missouri, as part of a "man swap." The transition was going fine until a serious buggy

accident landed him in the hospital, where he nearly died following surgery on his broken leg. After extensive therapy, he has lingering mobility problems and is still struggling to find his place in the world. When he realizes that his spirited pen pal, Rachel Miller, lives in a community where closed buggies are used, he decides on a whim to move there, hopeful for a fresh start. Rachel never expected to meet David Lapp in person. Even less did she anticipate that his intentions would be to court her. As their friendship moves from the written page to in-person encounters, they discover that the chemistry in their correspondence was real. But what will this mean for the future? Following their hearts—and God's leading—will require no small amount of sacrifice and significant life changes.

Dear Data - Giorgia Lupi 2016-09-13

Equal parts mail art, data visualization, and affectionate correspondence, Dear Data celebrates "the infinitesimal, incomplete, imperfect, yet exquisitely human details of life," in the words of Maria Popova (Brain Pickings), who introduces this charming and graphically powerful book. For one year, Giorgia Lupi, an Italian living in New York, and Stefanie Posavec, an American in London, mapped the particulars of their daily lives as a series of hand-drawn postcards they exchanged via mail weekly—small portraits as full of emotion as they are data, both mundane and magical. Dear Data reproduces in pinpoint detail the full year's set of cards, front and back, providing a remarkable portrait of two artists connected by their attention to the details of their lives—including complaints, distractions, phone addictions, physical contact, and desires. These details illuminate the lives of two remarkable young women and also inspire us to map our own lives, including specific suggestions on what data to draw and how. A captivating and unique book for designers, artists, correspondents, friends, and lovers everywhere.

Picturing the Postcard - Monica Cure
2018

The first full-length study of a once revolutionary visual and linguistic medium *Literature* has "died" many times—this book tells the story of its death by postcard. *Picturing the Postcard* looks to this unlikely source to shed light on our collective, modern-day obsession with new media. The postcard, almost unimaginably now, produced at the end of the nineteenth century the same anxieties and hopes that many people think are unique to twenty-first-century social media such as Facebook or Twitter. It promised a newly connected social world accessible to all and threatened the breakdown of authentic social relations and even of language. Arguing that "new media" is as much a discursive object as a material one, and that it is always in dialogue with the media that came before it, Monica Cure reconstructs the postcard's history through journals, legal documents, and sources from popular culture, analyzing the postcard's representation in fiction by well-known writers

such as E. M. Forster and Edith Wharton and by more obscure writers like Anne Sedgwick and Herbert Flowerdew. Writers deployed uproar over the new medium of the postcard by Anglo-American cultural critics to mirror anxieties about the changing nature of the literary marketplace, which included the new role of women in public life, the appeal of celebrity and the loss of privacy, an increasing dependence on new technologies, and the rise of mass media. Literature kept open the postcard's possibilities and in the process reimagined what literature could be.

Postcards - Lydia Pyne 2021-10-13

A global exploration of postcards as artifacts at the intersection of history, science, technology, art, and culture. Postcards are usually associated with banal holiday pleasantries, but they are made possible by sophisticated industries and institutions, from printers to postal services. When they were invented, postcards established what is now taken for granted in modern times: the ability to send and receive messages around the world easily and inexpensively. Fundamentally they are about creating personal connections—links between people, places, and beliefs. Lydia Pyne examines postcards on a global scale, to understand them as artifacts that are at the intersection of history, science, technology, art, and culture. In doing so, she shows how postcards were the first global social network and also, here in the twenty-first century, how postcards are not yet extinct.
