How the Zebra Got Its Stripes: Darwinian Stories Told Through Evolutionary Biology - Léo Grasset

2017-05-09

France's brightest young scientist lucidly explains the intricacies of the animal kingdom through the lens of evolutionary biology. Why do giraffes have such long necks? Why are zebras striped? And why does the clitoris of the female hyena exactly resemble and in most respects function like the male's penis?

Deploying the latest scientific research and his own extensive observations in Africa, Léo Grasset offers answers to these questions and many more in a book of post-Darwinian.

Complex natural phenomena are explained in simple and at times comic terms, as Grasset turns evolutionary biology to the burning questions of the animal kingdom, from why elephants prefer dictators and buffaloes democracies, to whether the lion really is king. The human is, of course, just another animal, and the author's exploration of two million years of human evolution shows how it not only informs our current habits and behavior, but also reveals that we are hybrids of several different species. Prepare to be fascinated, shocked, and delighted, as well as reliably advised—by the end, you will know to never hug the beautiful, cuddly honey badger, and what explains its almost psychotic nastiness. This is serious science at its entertaining best.

iBooks and Publishers Weekly
From an award-winning young author, a novel following a feisty heroine's quest to reclaim her past through the power of literature--even as she navigates the murkier mysteries of love. Zebra is the last in a line of anarchists, atheists, and autodidacts. When war came, her family didn't fight; they took refuge in books. Now alone and in exile, Zebra leaves New York for Barcelona, retracing the journey she and her father made from Iran to the United States years ago. Books are Zebra's only companions--until she meets Ludo. Their connection is magnetic; their time together fraught. Zebra overwhelms him with her complex literary theories, her concern with death, and her obsession with history. He thinks she's unhinged; she thinks he's pedantic. Neither are wrong; neither can let the other go. They push and pull their way across the Mediterranean, wondering with each turn if their love, or lust, can free Zebra from her

past. An adventure tale, a love story, and a paean to the power of language and literature starring a heroine as quirky as Don Quixote, as introspective as Virginia Woolf, as whip-smart as Miranda July, and as spirited as Frances Ha, Call Me Zebra will establish Van der Vliet Oloomi as an author "on the verge of developing a whole new literature movement" (Bustle).
