The Mind of Pope Francis - Massimo Borghesi 2018-08-15

A commonly held impression is that Pope Francis is a compassionate shepherd and determined leader but that he lacks the intellectual depth of his recent predecessors. Massimo Borghesi's *The Mind of Pope Francis: Jorge Mario Bergoglio's Intellectual Journey* dismantles that image. Borghesi recounts and analyzes, for the first time, Bergoglio's intellectual formation, exploring the philosophical, theological, and spiritual principles that support the profound vision at the heart of this pope's teaching and ministry. Central to that vision is the church as a *coincidentia oppositorum*, holding together what might seem to be opposing and irreconcilable realities. Among his guiding lights have been the Jesuit saints, Ignatius and Peter Faber; philosophers Gaston Fessard, Romano Guardini, and Alberto Methol Ferrer; and theologians Henri de Lubac and Hans Urs von Balthasar. Recognizing how these various strands have come together to shape the mind and heart of Jorge Mario Bergoglio offers essential insights into who he is and the way he is leading the church. Notably, this groundbreaking book is informed by four interviews provided to the author, via audio recordings, by the pope himself on his own intellectual formation, major portions of which are published here for the first time.

The Olive Tree Genome - Eddo Rugini 2016-12-21

This book provides an introduction to the genetics, genomics, and breeding of the olive tree, a multi-functional long-lived crop plant that is relevant not only for culinary olive and oil production, but also for shaping the landscape and history of many rural areas for centuries. Today, the recognized health benefits of extra-virgin olive oil provide new impulses for introducing innovation in olive crop management and olive breeding for a deeper understanding of the biological processes underlying fruit quality, adaptation to crop environment and response to threatening epidemics due to biological agents such as *Xylella fastidiosa*. The individual chapters discuss genetic resources; classic and modern breeding methods for providing new olive cultivars; the genotype x environment interactions determining the response to biotic and abiotic stresses; fruit metabolism related to oil production and the synthesis of health beneficial molecules; the mapping of genes and quantitative trait locus; and genomic, transcriptomic and proteomic strategies pertinent to the development of a molecular platform and template amenable to precise and rapid genetic modifications using recently developed genome editing tools.

The Dissemination of News and the Emergence of Contemporaneity in Early Modern Europe -

Brendan Dooley 2016-12-05

Modern communications allow the instant dissemination of information and images, creating a sensation of virtual presence at events that occur far away. This sensation gives meaning to the notions of 'real time' and of a 'present' that is shared within and among societies—in other words, a sensation of contemporaneity. But how were time and space conceived before modernity? When did this begin to change in Europe? To help answer such questions, this volume looks at the exchange of information and the development of communications networks at the dawn of journalism, when widespread public and private networks first emerged for the transmission of political news. What happened in Prague quickly reached Venice, and what happened in Naples was soon the talk of Hamburg. Gradually, enough became known about daily affairs around Europe for people to begin to think in terms of a 'shared present'. An analysis of contemporaneity adds a new dimension to the study of the origins of news and media history, as well as to the origins of a European identity. For whilst our understanding of the circulation of manuscript newsletters and printed reports has increased in recent years, much less is known about the impact of this burgeoning journalism on a pan-European scale. Each essay in this volume explores the ways in which this international impact helped foster a developing sense of contemporaneity that encompassed not just single countries, but Europe as a whole. Taken together the collection offers the first panoramic view of the way stories were born, grew and matured during their transmission from source to source, from country to country. The results published here suggest that a continent-wide network, including manuscript and print, for the transmission of stories from place to place, existed and was effective.

Crossing Borders, Crossing Cultures - Massimo Rospoher 2019-09-23

This volume explores the challenges and possibilities of research into the European dimensions of popular print culture. Popular print culture has traditionally been studied with a national focus. Recent research has revealed, however, that popular print culture has many European dimensions and shared features. A group of specialists in the field has started to explore the possibilities and challenges of research on a wide, European scale. This volume contains the first overview and analysis of the different approaches, methodologies and sources that will stimulate and facilitate future comparative research. This volume first addresses the benefits of a media-driven approach, focussing on processes of content recycling, interactions between text and image, processes of production and consumption. A second perspective illuminates the distribution and markets for popular print, discussing audiences, prices and collections. A third dimension refers to the transnational dimensions of genres, stories, and narratives. A last perspective unravels the communicative strategies and dynamics behind European bestsellers. This book is a source of inspiration for everyone who is interested in research into transnational cultural exchange and in the fascinating history of popular print culture in Europe.

Contributions look at a range of catastrophic events such as eruptions of Mount Vesuvius, floods, earthquakes, and outbreaks of plague and epidemics. A major aim of this volume is to investigate the relationship between catastrophic events and different communication strategies that embraced politics, religion, propaganda, dissent, scholarship as well as collective responses from the lower segments of

society. The contributors to this volume share a multidisciplinary approach to the study of natural disasters which draws on disciplines such as cultural and social history, anthropology, literary theory, and linguistics. Together with analyzing the prolific production of propagandistic material and literary sources issued in periods of acute crisis, the documentation on disasters studied in this volume also includes laws and emergency regulations, petitions and pleas to the authorities, scientific and medical treatises, manuscript and printed newsletters as well as diplomatic dispatches and correspondence.

Santiago Calatrava - Alexander Tzonis 1999

Very few designers of this century-- a century dominated by specialization and fragmentation-- can be called universal, but Santiago Calatrava is one of these few. In his numerous buildings, engineering projects, sculptures, and furniture designs, this Spanish architect whose practice is based in Switzerland has developed a unique poetics of morphology that overlaps structure and movement. Combining art and science, technology and architecture, Calatrava's bridges and buildings create a sublime elegance in their

urban contexts. With dynamic curves, leaning vertical elements, and mechanically operable roofs, they embody potential motion. In this book, Alexander Tzonis explores Calatrava's "poetics of movement" not only in the architect's large-scale work, but also in his drawings and sculptures. The book features thirty-five projects, fully documented with photographs, drawings, and sketches. Included are Calatrava's most recent works-- the Milwaukee Art Museum Addition and the Orient Station in Lisbon-- and his best known, from the Montjuic Tower to the Alameda Bridge.

Historia Ludens - Alexander von Lünen 2019-09-20

This book aims to further a debate about aspects of "playing" and "gaming" in connection with history. Reaching out to academics, professionals and students alike, it pursues a dedicated interdisciplinary approach. Rather than only focusing on how professionals could learn from academics in history, the book also ponders the question of what academics can learn from gaming and playing for their own practice, such as gamification for teaching, or using "play" as a paradigm for novel approaches into historical scholarship. "Playing" and "gaming" are thus understood as a broad cultural phenomenon that cross-pollinates the theory and practice of history and gaming alike.

Fascism, Anti-fascism, and Italians in Australia, 1922-1945 - Gianfranco Cresciani 1980

Santiago Calatrava: Bridges - Santiago Calatrava 2022-12-09

Santiago Calatrava is among the most important and influential architects of our times. His candid architecture is polarizing yet unmistakable. The trademark of the Spanish architect are sculptural bridge designs that gained international acclaim as a symbiosis of elegant shape vocabulary and engineering masterstrokes and that shape the cityscapes in locations such as Jerusalem, Venice, Dallas, and Buenos Aires. The book is a special homage to his work: Santiago Calatrava in person talks about the visions on artistic-architectural philosophies behind his unparalleled bridge designs. He also contributes many descriptions of implemented and unimplemented works, which, together with first drafts, water color paintings, as well as high-quality photographs and renderings document the selected projects.

Italian Ceramics - Catherine Hess 2003-01-01

In 1984 the Getty Museum acquired an exceptional collection of Italian Renaissance maiolica, or tin-glazed earthenware. These often brilliantly colored objects range from an early Florentine jar with relief-blue decoration to a much later Mannerist dish with grotesque ornament. The collection was the subject of Italian Maiolica, a beautifully illustrated catalogue that the Museum published in 1988. Italian Ceramics amplifies and updates the earlier volume, including objects—some of them porcelain and terracotta—acquired during the intervening years. Among them are a pair of eighteenth-century candlesticks representing mythological scenes and a tabletop with hunting scenes; and, from the 1790s, the

beautifully modeled and painted Saint Joseph with the Christ Child. Italian Ceramics contains the most recent scientific, historical, and iconographic information about the Museum's holdings. Completely revised and expanded, this book offers a wealth of new information about the Getty Museum's superb collection, which spans more than four centuries of Italian ceramic art.

The Semantics of Prepositions - Cornelia Zelinsky-Wibbelt 1993-01-01

Santiago Calatrava : works in progress - Luca Molinari 1999

Santiago Calatrava. With more than ten years having passed since the 'case' of Calatrava was introduced into the international debate, it remains as relevant as ever to ask the same questions posed back then regarding an artistic personality and oeuvre still capable of provoking such heated and contradictory reactions from critics, the general public, and contemporary architectural culture alike. The extremism of the positions assumed by those faced with Calatrava's work compels us inevitably to investigate a phenomenon that intersects with the redefinition of the relationship between art and technology, or more specifically, between architecture and engineering, not to mention the crisis of the professions and their social credibility.

Critical Writings - Filippo Tommaso Marinetti 2007-04-07

The Futurist movement was founded and promoted by Filippo Tommaso Marinetti, beginning in 1909 with the First Futurist Manifesto, in which he inveighed against the complacency of "cultural necrophiliacs" and sought to annihilate the values of the past, writing that "there is no longer any beauty except the struggle. Any work of art that lacks a sense of aggression can never be a masterpiece." In the years that followed, up until his death in 1944, Marinetti, through both his polemical writings and his political activities, sought to transform society in all its aspects. As Günter Berghaus writes in his introduction, "Futurism sought to bridge the gap between art and life and to bring aesthetic innovation into the real world. Life was to be changed through art, and art was to become a form of life." This volume includes more than seventy of Marinetti's most important writings—many of them translated into English for the first time—offering the reader a representative and still startling selection of texts concerned with Futurist art, literature, politics, and philosophy.

FDR and the Spanish Civil War - Dominic Tierney 2007-06-11

What was the relationship between President Franklin D. Roosevelt, architect of America's rise to global power, and the 1936-39 Spanish Civil War, which inspired passion and sacrifice, and shaped the road to world war? While many historians have portrayed the Spanish Civil War as one of Roosevelt's most isolationist episodes, Dominic Tierney argues that it marked the president's first attempt to challenge fascist aggression in Europe. Drawing on newly discovered archival documents, Tierney describes the evolution of Roosevelt's thinking about the Spanish Civil War in relation to America's broader geopolitical interests, as well as the fierce controversy in the United States over Spanish policy. Between 1936 and 1939, Roosevelt's perceptions of the Spanish Civil War were transformed. Initially indifferent toward which side won, FDR became an increasingly committed supporter of the leftist government. He believed that German and Italian intervention in Spain was part of a broader program of fascist aggression, and he worried that the Spanish Civil War would inspire fascist revolutions in Latin America. In response, Roosevelt tried to send food to Spain as well as illegal covert aid to the Spanish government, and to mediate a compromise solution to the civil war. However unsuccessful these initiatives proved in the end, they represented an important stage in Roosevelt's emerging strategy to aid democracy in Europe.

The Boundaries of Europe - Pietro Rossi 2015-04-24

Europe’s boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe’s boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to “Europeanize” the world. From the decline of the Roman Empire to the polycentrism of today’s world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from “mare nostrum” to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is

the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

Translating Culture Specific References on Television - Irene Ranzato 2015-09-16

Translating Culture Specific References on Television provides a model for investigating the problems posed by culture specific references in translation, drawing on case studies that explore the translational norms of contemporary Italian dubbing practices. This monograph makes a distinctive contribution to the study of audiovisual translation and culture specific references in its focus on dubbing as opposed to subtitling, and on contemporary television series, rather than cinema. Irene Ranzato’s research involves detailed analysis of three TV series dubbed into Italian, drawing on a corpus of 95 hours that includes nearly 3,000 CSR translations. Ranzato proposes a new taxonomy of strategies for the translation of CSRs and explores the sociocultural, pragmatic and ideological implications of audiovisual translation for the small screen.
