The Curious Incident of the Dog in the Night-Time - Mark Haddon 2009-02-24

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime

number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Auto Accident Information Log - Lee Holbrook 2016-05-27

Being involved in an automotive related accident is a stressful situation and we find that far too many individuals get caught not knowing what to do when this occurs. Therefore, we've created this log as a valuable reference and simple tool for collecting the necessary information for submitting an insurance claim. We suggest placing one of these logs in the glove box of each vehicle you own. The pages of this log are designed in a "fill in the blank" format, with enough space for documenting up to 15 different accidents. The interior contains spaces for logging valuable information following an accident, such as: - Date, Time & Location of Accident - Other Driver's Contact Information - Other Driver's Vehicle Information - Other Driver's Insurance Information - Description of Damage to Vehicles - Passenger Information - Witness Information - Other valuable notes or drawings

FRA Guide for Preparing Accident/incident Reports - United States. Federal Railroad Administration. Office of Safety 1986

Maximizing Profitability with Safety Culture Development - Clifford Florczak 2002-11-07

Cliff Florczak has been an integral part of a number of highly successful zero incidents safety culture development programs. Here, he shares the details of these programs in order to provide others with the necessary information to assess their own safety culture. After a brief background on safety cultures themselves, the author utilizes some of the basic safety principles, combines them with some of the basic management theories

and puts all of this to use in real life situations. Aims for zero incidents to control costs and losses Packed full of real-life examples and analogies Learn what to look for, where to look for it and how to go about making improvements

Accident/Incident Prevention Techniques - Charles D. Reese
2003-12-15

This A-to-Z, hands-on guidebook addresses the responsibilities, principles, tools and techniques involved in accident investigation and loss control. It blends theory and applications and takes the reader from investigative planning and preparation through the various methods and equipment used, all the way to system safety applications. It covers a myriad of accident prevention techniques, which have been in use by the safety community for many years. The information and illustrations included in this book will allow the reader to begin to develop and build a safety and health program in the workplace. Detailed information is included on: * safety analysis * job safety observations * safety and health tracking * safe operating procedures * root, change, casual, and barrier analysis * resource and information sources This book is applicable to a wide range of occupations since there are no risk free workplaces. It is especially written for occupational safety and health professionals who addresses these issues at work and will also be an excellent source of study for training practitioners and students of this discipline.

Broadcast News Writing, Reporting, and Producing - Frank Barnas 2021-03-22

Now in its eighth edition, Broadcast News Writing, Reporting, and Producing is the industry's leading textbook covering all aspects of the three pillars of broadcast news. The book discusses the key strategies and terms of newsgathering and delivery by providing real-world, professional advice for broadcast journalists in the modern-day newsroom. New to the eighth edition is the Best Apps feature, which identifies the most productive apps used by working journalists when covering stories. The book also covers the ever increasing diversity of the journalism field and brings in new voices from professionals working in the industry to discuss these topics. Other new additions include in-depth discussions of fake news, expanded coverage of social media in the newsroom, and an overview of the latest advances in technology available to television and radio news reporters. Broadcast News Writing, Reporting, and Producing remains the best book for undergraduate students in journalism writing, producing, newsgathering, and multimedia courses. An accompanying companion website features resources to help instructors deliver online courses, including Powerpoints, Quizlets, and a sample syllabus.

Heavy Vehicle Event Data Recorder Interpretation - Christopher D Armstrong 2018-11-02

The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have

been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

Climbing Walls - Jim Stiehl 2005

This book is a complete guide for instructors and administrators, who can use this book to: design and select equipment options for climbing walls based on up-to-date industry standards and guidelines; customize their walls to accommodate the particular needs of their sites or situations; operate and maintain their walls; develop and implement operating procedures; and teach basic climbing skills and 15 climbing wall games to diverse populations.
