Illustrated standard catalogue with valuations of the coinage of the British Isles from 500 A.D., the British Empire from 1600 A.D.

Bulletin de la Société Académique - Academie Du Var 2019-02-21

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Real-World Decision Support Systems - Jason Papathanasiou 2016-12-19

This book presents real-world decision support systems, i.e., systems that have been running for some time and as such have been tested in real environments and complex situations; the cases are from various application domains and highlight the best practices in each stage of the system's life cycle, from the initial requirements analysis and design phases to the final stages of the project. Each chapter provides decision-makers with recommendations and insights into lessons learned so that failures can be avoided and successes repeated. For this reason unsuccessful cases, which at some point of their life cycle were deemed as failures for one reason or another, are also included. All decision support systems are presented in a constructive, coherent and deductive manner to enhance the learning effect. It complements the many works that focus on theoretical aspects or individual module design and development by offering 'good' and 'bad' practices when developing and using decision support systems. Combining high-quality research with real-world implementations, it is of interest to researchers and professionals in industry alike.

The Sassanids In The 220's A.D. Examines Its Expansion And Interactions With Rome And Its Neighbors.

The Beginning of the Use of Metals and Alloys - Robert Maddin 1988

These thirty original essays form a landmark contribution to the history of metallurgy: together they present the first systematic survey of the beginning of the use of metals and alloys throughout the world. What distinguishes the book as a whole is the orientation of the writers toward seeing the objects they uncover in human-historical terms, reminding us that at all stages in history and in every part of the world, cultural change and advances in the use of metals are often closely intertwined. The articles are arranged in roughly chronological-geographical order; some are specific studies of sites, objects, and processes; others examine more general aspects of archaeometallurgy within a general field that has come to be called "archaeometry"; and still others are interpretive and reflective essays on human history and cultural change (a particularly fine example of this approach is Heather Lechtman's essay on Central Andean metalworking). Archaeologists, historians, metallurgists, chemists, and geologists cover topics as diverse as iron trade in northern Scandinavia, the fabrication of gold foil in Japan, copper mining in eastern India, prehistoric metallurgy in Thailand, iron bloomery in Africa, early copper smelting in Palestine, and Chinese techniques for casting old belt plaques. And in his Foreword, Cyril Stanley Smith proposes structural metaphors that describe the historical reworkings of human society in terms of the transformations of materials. Robert Maddin is Honorary Curator of Archaeological Sciences, Peabody Museum of Archaeology and Ethnology, Harvard University. *The Beginning of the Use of Metals and Alloys* was derived from the second international conference on the subject, held in Zhengzhou, China in 1986.

Napoleon the Great - Andrew Roberts 2016-05-27

From Andrew Roberts, author of the Sunday Times bestseller *The Storm of War*, this is the definitive modern biography of Napoleon. It has become all too common for Napoleon Bonaparte's biographers to approach him as a figure to be reviled, bent on world domination, practically a proto-Hitler. Here, after years of study extending even to visits paid to St Helena and 53 of Napoleon's 56 battlefields, Andrew Roberts has created a true portrait of the mind, the life, and the military and above all political genius of a fundamentally constructive ruler. This is the Napoleon, Roberts reminds us, whose peacetime activity

produced countless indispensable civic innovations - and whose Napoleonic Code provided the blueprint for civil law systems still in use around the world today. It is one of the greatest lives in world history, which here has found its ideal biographer. The sheer enjoyment which this book will give anyone who loves history is enormous.

The New Science of Giambattista Vico - Giambattista Vico 2016-04-15

A pioneering treatise that aroused great controversy when it was first published in 1725, Vico's New Science is acknowledged today to be one of the few works of authentic genius in the history of social theory. It represents the most ambitious attempt before Comte at comprehensive science of human society and the most profound analysis of the class struggle prior to Marx.
