[An Entire MBA in 1 Course](#) - Chris Haroun
2016-02-09

** ACCORDING TO BUSINESS INSIDER:

"Getting your MBA has never been easier. Haroun is one of the highest rated professors on Udemy, so you can expect to be in good hands through the course of your education." ** This is the book version of the popular Udemy.com course called "An Entire MBA in 1 Course." From the Author of "101 Crucial Lessons They Don't Teach You in Business School," which Forbes magazine calls "1 of 6 books that all entrepreneurs need to read right now." This book will teach you everything you need to know about business....from starting a company to taking it public. Most business books are significantly outdated. This book leverages many online resources and makes the general business, accounting and finance process very

easy to understand (and enjoyable too)! There are many incredibly engaging and entertaining video links in the book to YouTube and other sources; 'edutainment' works! Although this book is close to 400 pages, I tried to visualize the content of this book as much as possible as this is a more impactful and enjoyable way to learn (think Pinterest versus the tiny words in the Economist)! The contents of this book are all based on my work experience at several firms, including Goldman Sachs, the consulting industry at Accenture, a few companies I have started, the hedge fund industry where I worked at Citadel and most recently, based on my experience at a prominent San Francisco based venture capital firm. I also included many helpful practical business concepts I learned while I did an MBA at Columbia University and a Bachelor of Commerce degree at McGill University. Think of this book as a "greatest hits" business summary from my MBA, undergraduate business degree, work experience in consulting,

equities, hedge funds, venture capital and starting my own companies. As the title of this book suggests, this is an entire MBA in one book; it's also a practical manual to help you accomplish your business career goals. I have minimized "boring theoretical concepts" in this book in order to keep it as close to reality as possible. I hope you enjoy it! In addition to teaching at 4 universities in the San Francisco Bay Area, you can find other courses that I teach online at www.udemy.com/user/chris-haroun/.

Executive Finance and Strategy - Ralph Tiffin
2014-09-03

Many strategies are explained as actions that will achieve the desired goals or visions of the company, but in order to predict the success of your strategy it is vital to gain an understanding of how it will impact on the financial statement. Executive Finance and Strategy works on the premise that financial models can clearly demonstrate where a particular strategy might lead, enabling you to evaluate past accounts and statements in order to respond to recent company history. It also explains how company law and ethics underpin financial statements and clarifies your responsibilities as a senior

manager or director. By using finance as a record keeper and predictor of success, it helps you quantify your strategy to gain support from colleagues and take the right actions to ensure sustainable growth.

Understanding Islamic Financial Services -

Karim Ullah 2017-04-03

Understanding Islamic Financial Services offers fresh insights on the Islamic financial system.

The importance of this system cannot be underestimated. Experts expect that it is likely to sustain double digit growth globally over the next few years, and demand for professionals in the area has never been higher, both in the UK and around the world. While other texts on the subject look at the basic concepts, principles, contracts and financial products used in Islamic banking and finance, Understanding Islamic Financial Services goes one step further and provides a new context, identifying four levels on which the Islamic Financial system operates: product level, institution level, market level and inter-market level. It considers Islamic banking and finance as a multi-level service system, an

approach which will enable students and professionals of Islamic finance to gain a more in-depth, holistic understanding of how the system functions. Understanding Islamic Financial Services covers contemporary developments in service science (e.g. service theories, service visualization tools and service co-creation concepts) and implications for the development and sustainability of Islamic financial services. Examples from practice enliven the text and allow the reader to relate the theories and principles discussed to current practice.
