Managing Sustainable Business - Gilbert G. Lenssen 2018-03-07

This book offers 32 texts and case studies from across a wide range of business sectors around a managerial framework for Sustainable Business. The case studies are developed for and tested in executive education programmes at leading business schools. The book is based on the premise that the key for managing the sustainable business is finding the right balance over time between managing competitiveness and profitability AND managing the context of the business with its political, social and ecological risks and opportunities. In that way, a sustainable business is highly responsive to the demands and challenges from both markets and societies and managers embrace the complexity, ambivalence and uncertainty that goes along with this approach. The book presents a framework that facilitates the adoption of best business practice. This framework leads executives through a systematic approach of strategic analysis and business planning in risk management, issues management, stakeholder management, sustainable business

development and strategic differentiation, business model innovation and developing dynamic capabilities. The approach helps broaden the understanding of what sustainable performance means, by protecting business value against sustainability risks and creating business value from sustainability opportunities.

A History of Corporate Financial Reporting in Britain - John Richard Edwards 2018-07-11

A History of Corporate Financial Reporting provides an understanding of the procedures and practices which constitute corporate financial reporting in Britain, at different points of time, and how and why those practices changed and became what they are now. Its particular focus is the external financial reporting practices of joint stock companies. This is worth knowing about given the widely held view that Britain (i) pioneered modern financial reporting, and (ii) played a primary role in

the development of both capital markets and professional accountancy. The book makes use of a principal and agent framework to study accounting's past, but one where the failure of managers always to supply the information that users' desire is given full recognition. It is shown that corporate financial reporting did not develop into its current state in a straightforward and orderly fashion. Each era produces different environmental conditions and imposes new demands on accounting. A proper understanding of accounting developments therefore requires a careful examination of the interrelationship between accountants and accounting techniques on the one hand and, on the other, the social and economic context within which changes took place. The book's corporate coverage starts with the legendary East India Company, created in 1600, and continues through the heyday of the statutory trading companies founded to build Britain's canals (commencing in the 1770s) and railways (commencing c.1829) to focus, principally, on the limited liability company fashioned by the Joint Stock Companies Act 1844 and the Limited Liability Act 1855. The story terminates in 2005 when listed companies were required to prepare their consolidated accounts in accordance with International Financial Reporting Standards, thus signalling the effective end of British accounting.

The Role of Multinational Companies in the Middle East - Mamarinta P. Mababaya 2002

This study investigated whether known economic and international business theories available in the literature are meaningful enough to explain the nature, existence and role of multinational companies (MNCs) in the Middle East, particularly Saudi Arabia. Two sets of questionnaires were distributed in major cities of Saudi Arabia -- one set

for 100 multinational managers and another for 280 multinational customers. 234 questionnaires were collected -- 45 from multinational managers and 189 from customers. This represents a total response rate of 62 percent, which is adequate for this study. The empirical results, supported with comprehensive secondary data, confirmed virtually all of the research hypotheses. The study found that joint ventures are the dominant form of multinational business in Saudi Arabia, both in manufacturing and service industries. The core roles of MNCs in the Saudi-foreign ventures are evident in the cross-border value-adding activities of marketing, trading, manufacturing, consulting, contracting, project management, insurance, hotel operation and banking. Likewise, MNCs provide licensing, franchising, financing services and various auxiliary roles in the Kingdom. Therefore, the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production -- the main subject of contemporary multinational theories. The respondents generally perceived the competitiveness of MNCs operating in Saudi Arabia as a function of a number of economic, management, marketing, technological and other variables. They also perceived the contributions of MNCs to the Kingdom's socio-economic developments as significant and positive. The study also found that understanding Islamic values and ethics is important for MNCs. In this regard, the researcher looked at some objective indicators of business success and related them to selected measures of MNCs' local cultural awareness and responsiveness. The results indicate that the business success of multinationals operating in Saudi Arabia is positively related to their local cultural awareness and responsiveness. Along this line, this study covers some vital elements of Islamic culture, which will help MNCs understand further the cultural needs, values and sensitivities of the Saudi people and Muslims in general.

Participation in EU Rule-making - Joana Mendes 2011-04-07

The limited scope of participation in the making of EU law remains a continued source of controversy, featuring prominently in recent institutional and political developments that have been shaping the EU's constitutional framework - most intensely in the follow up of the Commission's White Paper on Governance. Yet little attention has been paid to participation rights as a means of ensuring the procedural protection of persons affected by EU regulation in its diverse forms. This is a dimension of the rule of law that has been largely ignored by EU legislative and judicial bodies. Not only the legislator, but also the Court of Justice and the Court of First Instance tend to adhere to excessively formal conceptions of participation rights that are premised on the right to be heard in individual procedures, as well as to a restrictive view regarding the relationships between the citizens and the administration. This book shows why, in the face of new regulatory developments, these conceptions are currently inadequate to ensure the legal protection of rights and interests affected by EU regulation. Combining a conceptual analysis with thorough empirical scrutiny, this book assesses the scope of participation rights in EU law against their rationales and underlying legal values. It makes a case for the extension of participation rights to new situations and new types of procedures, in particular those that would generally fall within the category of rulemaking. It brings distinct normative insights into a crucial theme of EU administrative law, and makes a topical and timely contribution to the increasingly notable theme of public participation in EU regulation. Joanna Mendes' 2009 thesis upon which Participation in EU Rule-Making is based was awarded the the European University Institute (Florence) Mauro Cappelletti Prize for the best doctoral thesis using a methodology of comparative law

Constitutional Rights after Globalization - Gavin Anderson 2005-05-11

Constitutional Rights after Globalization juxtaposes the globalization of the economy and the worldwide spread of constitutional charters of rights. The shift of political authority to powerful economic actors entailed by neo-liberal globalization challenges the traditional state-centred focus of constitutional law. Contemporary debate has responded to this challenge in normative terms, whether by reinterpreting rights or redirecting their ends, e.g. to reach private actors. However, globalization undermines the liberal legalist epistemology on which these approaches rest, by positing the existence of multiple sites of legal production, (e.g. multinational corporations) beyond the state. This dynamic, between globalization and legal pluralism on one side, and rights constitutionalism on the other, provides the context for addressing the question of rights constitutionalism's counterhegemonic potential. This shows first that the interpretive and instrumental assumptions underlying constitutional adjudication are empirically suspect: constitutional law tends more to disorder than coherence, and frequently is an ineffective tool for social change. Instead, legal pluralism contends that constitutionalism's importance lies in symbolic terms as a legitimating discourse. The competing liberal and 'new' politics of definition (the latter highlighting how neoliberal values and institutions constrain political action) are contrasted to show how each advances different agenda. A comparative survey of constitutionalism's engagement with private power shows that conceiving of constitutions in the predominant liberal, legalist mode has broadly favoured hegemonic interests. It is concluded that counterhegemonic forms of constitutional discourse cannot be effected within, but only by unthinking, the dominant liberal legalist paradigm, in a manner that takes seriously all exercises of political power.

EU Law for UK Lawyers - Aidan O'Neill 2011-07-27

This is the second edition of this wide-ranging survey of EU law. The new

edition has been significantly enlarged. Unlike many other EU law books it takes full account not only of the Lisbon Treaty changes to the EU treaties, but also of the fact that the EU Charter of Fundamental Rights now has the same legal value as the EU Treaties. It therefore not only covers the relevant case law of the Court of Justice of the European Union, but also ties that case law into the decisions of the European Court of Human Rights, because it is clear that EU law can only now properly be understood and applied against this background of European fundamental rights jurisprudence. The book sets out very clearly the broad shape of the European Union's legal systems, while also giving the reader a good feel for the policy motivations in the Court of Justice of the European Union and the scope of EU legislative activity. Written in a lively and accessible style, it is an ideal guide for practitioners, whether those coming to the subject for the first time or those already with a background in EU law. Among the additions and changes in this expanded edition the book includes new chapters on the EU and fundamental rights, on commercial agency, on criminal law and on private international law in the EU. It also contains a full treatment of EU equality law. The first edition 'EC Law for UK Lawyers' by Aidan O'Neill and Jason Coppel (ISBN: 9780406024596) was published by Butterworths in 1994.

Safeguarding Companies' Rights in Competition and Anti-dumping/anti-subsidies Proceedings - Themistoklis K. Giannakopoulos 2011-01-01

Focusing on the rules safeguarding procedural due process in the administrative procedures of the Commission, this fully updated edition of a widely used handbook covers the four principal fields that entail enforcement of substantive competition rules: antitrust, merger, anti-dumping/antisubsidies, and State aid. Among the many practical issues raised are the following: the right of directly involved parties to bring an action before the European Courts in merger, anti-dumping/anti-subsidies, and State-aid cases; the rights of complainants in antitrust cases; the rights and obligations of beneficiaries in State-aid cases; the extent to which the right to confidential communication between lawyer and client in these cases is recognised by the European Commission and the European Courts; the right to silence to avoid self-incrimination in antitrust cases; the right to respect for confidentiality and the right to be heard during the preliminary factfinding procedure of the Commission; the obligations of an undertaking during the fact-finding procedure of the Commission; the right of access to the Commission's file; the right to a fair hearing of all the parties concerned by the Commission proceedings; and the applicability of Article 6 of the European Convention of Human Rights (ECHR) to EU antitrust procedures. Three tables consolidate briefly and comparatively the rights and the obligations of the private parties in the four proceedings, as well as their right to bring an action before the European Courts. These tables give the reader the opportunity to easily check out what is the situation in the four proceedings regarding a specific right or obligation. The author's analysis draws on all the relevant judgments of the European Courts, and the book comes with a wealth of reference material, including detailed footnotes, lists of

legislation and cases in both chronological and alphabetical order, and an extensive bibliography.
