**Military Justice: Cases and Materials** - Eugene R. Fidell 2012-02-17

Military Justice: Cases and Materials gives teachers a new and powerful tool to introduce students to military law while deepening their understanding of criminal law and procedure,

comparative law, international law, and constitutional law. At a time when the tempo of military operations around the world seems to increase constantly and high-profile courts-martial dominate the headlines, this book gives students and teachers unprecedented the tools needed to analyze, understand, and evaluate worldwide military justice. With

prosecutions arising from prisoner abuse, atrocities against civilians, and servicemembers' opposition to ongoing wars, the military justice system now has a prominence unmatched since the Vietnam era. This higher profile for courts-martial, combined with the difficult and fundamental legal issues raised by the military commissions, suggests that military courses will now be in great demand. This casebook provides the text for such a course. Its coverage of the U.S. court-martial and other systems of military criminal law provides a framework through which students can explore the role and operation of military justice within a democratic society. In an era of worldwide deployments, multi-national operations, and global terrorism, this book illuminates the interconnectedness of military justice systems through a far-ranging collection of judicial opinions, statutes, regulations, commentaries, and scholarship. While the materials presented

draw heavily from the United States, most chapters also present materials from other jurisdictions to enhance students' appreciation of both the unique American experience and the availability of alternative approaches to military discipline, accountability, and punishment. International norms are also examined. Part I, Foundations, sets the stage by exploring the origins and purposes of military justice, pointing out the many sources of law that govern this area, analyzing the unique and critical role of the commander in military justice, and assessing professional responsibility rules for military lawyers. Part II, Principles, steps further into legal analysis to study the jurisdiction of military courts, identify crimes and defenses that apply only in a military context, and analyze the extent to which the obligations of military service alter the protection of fundamental rights. Part III, Trials, brings students into the court-martial to meet military

judges, juries, and counsel and to study the rules of procedure, evidence, sentencing, and appeal. Part IV, Special Contexts, takes a broader approach to assess the challenges that a military justice system faces during combat and peacekeeping operations. This part also looks at the topic of military commissions. Part V, The Future, gives students a glimpse into the changes that lie ahead by focusing on the processes of legal reform and globalization.

*Incarceration and the Law, Cases and Materials* - Margo

Schlanger 2020-05-29

In the age of American mass incarceration, a complex legal regime governs prison conditions and presents a host of controversial questions at the intersection of constitutional liberty, statutory interpretation, administrative regulation, and public policy. This is a completely overhauled, re-titled, and much-expanded version of the leading casebook about incarceration. It addresses both pretrial and post-conviction incarceration, presenting Supreme Court and leading lower court case law, statutes, litigation materials, professional standards, academic commentary, and prisoner writing. Topics include conditions of confinement, civil liberties, particular prisoner populations and relevant legal issues (race and national origin discrimination, the particular issues/law governing treatment of incarcerated women, LGBTQ people, and people with disabilities). Litigated remedies (injunctive litigation, damages,

the Prison Litigation Reform Act, and criminal prosecution of prison staff), are also covered in detail, as is non-litigation oversight. The casebook is supplemented by an open-access website that offers additional resources and sources for further reading. This edition includes substantially more material from the International Criminal Court

and the revival of the hybrids model, including revised materials on the crime of aggression, new jurisdictional theories, and controversial recent jurisprudence.

Texas Criminal Law - Dorie Klein 2017-12-05

Designed for use in a 1L Criminal Law course, this new casebook covers the traditional criminal law topics; because Texas is a Model Penal Code jurisdiction, it focuses primarily on Texas cases and statutes. Student self-assessment features include comprehension questions to test understanding of the basic concepts, as well as discussion questions that test students' ability to apply the basic concepts beyond the facts of the presented case. Practice multiple-choice and essay questions at the end of most chapters give students additional opportunities to assess their knowledge.

This problem-pedagogy casebook gives due attention to common law cases but also emphasizes the importance of statutes in the modern world. Beginning with an overview of the criminal justice system, the book goes on to devote chapters to the following topics: punishment, making criminal law, conduct, mental states, homicide, causation, defenses, rape, attempted crimes, complicity, conspiracy, and theft. Criminal Law also includes an appendix with relevant sections of the Model Penal Code.

**Criminal Law** - Cynthia Lee  
2014-05-09

This text, the only criminal law casebook authored by two progressive female law professors of color, provides the reader with both critical race and critical feminist theory perspectives on criminal law while following a traditional format. All of the usual subject areas are covered, but the book is unique in highlighting the cultural context of substantive criminal law. The book seamlessly integrates issues of race, gender, class, and sexual orientation so the teacher who wishes to address such issues does not have to assign supplemental reading assignments in order to do so. The book is also very student-friendly, providing a brief doctrinal overview of the subject matter at the beginning of each chapter. The book does away with the tradition of long lists of notes and questions following the cases, a trademark feature of many older casebooks, putting this material in the Teachers

The forthcoming third edition is fresh and innovative, referencing several ripped from the headlines controversies, including the shooting of Trayvon Martin by George Zimmerman and Florida's stand your ground law, the arrest of African American Harvard professor Henry Louis Gates, Jr. for disorderly conduct, the shooting of Larry King, a gender nonconforming teenager, by classmate Brandon McInerney and the gay panic defense, and the repeal of North Carolina's Racial Justice Act.

explanatory sections describe the law through lively language and colorful examples that students can readily grasp and remember. Providing students with a clear doctrinal overview permits the selection of cases that drill down deeper into fundamental or cutting-edge issues. Many of the principal cases put the old wine of the criminal law into new bottles that students will find meaningful and interesting. In addition to homicide, rape, assault, traditional property crimes and drug offenses, the cases selected include environmental and white collar crime, obstruction of justice, criminal copyright infringement, hate crimes, sex trafficking, online threats, revenge porn and computer crimes. Short discussion questions follow each case that stimulate understanding of the holding and the deeper issues at stake. Additional materials raise important critical perspectives dealing with issues of race, class and gender. Practice problems and links to online video clips allow

students to apply what they are learning, and the appendix contains numerous materials for engaging lawyering exercises.

### **Cases and Problems in Criminal Law** - Myron

Moskovitz 2012-01-20

A client comes to a lawyer with a difficult legal problem, involving a complex set of facts. The lawyer then researches the legal issues, finding a cluster of cases and statutes - almost all from the jurisdiction in which the problem arises. In order to advise the client (and, if necessary, to litigate the case), the lawyer must analyze, distinguish, reconcile, and interrelate the authorities in the cluster, seeing them as a group indicating the direction of that state's law, as well as seeing them separately. Cases and Problems in Criminal Law contains the caselaw that law students have to know and helps professors to recreate that experience so their students can learn how to handle it. This eBook features links to Lexis Advance for

This title is a part of our CasebookPlus(tm) offering as ISBN 9781634601658. Learn more at CasebookPlus.com. This popular casebook, through the selection of classic and modern cases, provides an excellent tool for teaching students the common law foundations of the criminal law and modern statutory reform, including the Model Penal Code. Along the way, the casebook considers modern controversies (e.g., "shaming" punishment, capital punishment, broadening sexual assault law, self-defense by battered women, euthanasia, the role of culture in determining culpability), and creatively uses literature (e.g., examining insanity through Edgar Allen Poe's The-Tell Tale Heart) and even "brain teasers" to confront (as the Preface states) "the Big Questions . . . that philosophers, theologians, scientists, and poets, as well as lawyers, have grappled with for

centuries." The Seventh Edition, as in the past, includes new cases, as well as updates in the notes that bring current issues of criminal law to the fore. New Power Points have been added to the casebook companion website. For more information and additional teaching materials, visit the companion site.

**Cases and Materials on Trade Secret Law** - Elizabeth Rowe 2016-11-23

This is the second edition of the first casebook in the United States devoted exclusively to trade secret law. As with the successful first edition, it is challenging yet user-friendly to students in order to facilitate their reading and understanding of the material. It is designed to be used by law students (and business students) with no prior background in intellectual property law. Due to the breadth of the subject matter, professors who teach trade secret law need not be intellectual property experts, but can specialize in a variety of fields, including employment

law, torts, and unfair competition. The casebook also provides the context to re-teach and reinforce many of the basic concepts of law that students learned as 1L's, including tort law, contract law, property law, civil procedure, constitutional law, and criminal law. This new edition includes timely additions relating to the Defend Trade Secrets Act of 2016 (DTSA) and the EU Trade Secret Directive, two laws that went into effect in mid-2016, and which are certain to change the landscape of trade secret law in the United States and Europe. Unlike the only other existing casebook on the topic, this book continues to focus on and teach the predominant source of trade secret law in the U.S., the Uniform Trade Secrets Act (UTSA) as interpreted by courts throughout the U.S. The authors have made conscious and thoughtful decisions about the way in which the information throughout the casebook is presented and organized. The general

organization of the casebook follows a logical analytical approach to understanding trade secret law with the chapters progressing from proving the essential elements of a trade secret claim to defensive tactics and remedies, managing trade secrets, and criminal actions. It also addresses employment, management, and international issues.

Louisiana Criminal Law: Cases and Materials, Second Edition is a textbook designed for use in the basic Criminal Law course taught in a law school or an undergraduate program in Criminal Justice. The format of this book is a combination of Louisiana criminal cases, statutes, comments and questions. International Criminal Law

provides a set of teaching materials furnishing students with a grounding in the transnational issues likely to arise in federal criminal cases, and also in the law produced as a consequence of international efforts to impose criminal responsibility on the perpetrators of human rights atrocities. International Criminal Law offers, for teaching purposes, a collection of cases (mainly domestic) and other materials, together with notes and questions about those cases and materials. The first part introduces the field of international criminal law, and includes a chapter on the general principles of both domestic and international law governing efforts to apply U.S. criminal law to foreign crimes and foreign criminals. The second part covers the specific application of those principles to cases involving the Foreign Corrupt Practices Act, antitrust and securities regulation, export controls, computer crimes, narcotics and money laundering, piracy and terrorism, and torture. The

third part addresses procedural aspects of trying such cases in U.S. courts. This section also treats the extraterritorial application of the U.S. Constitution, immunities from jurisdiction, mutual assistance in criminal cases, extradition, alternatives to extradition, prisoner transfers, recognition of foreign criminal judgments, and the bearing on international human rights instruments on criminal procedure. The final part of International Criminal Law deals with the prosecution of international crimes, and takes up the question of what crimes constitute international crimes. This section also discusses the Nuremberg and Tokyo precedents, the ad hoc tribunals for the former Yugoslavia and for Rwanda, the Rome Statute of the International Criminal Court, and the substantive law of international crimes such as aggression, genocide, crimes against humanity, and war crimes. International Criminal Law is supplemented annually. This eBook features links to

From a preeminent authorship team, *Criminal Law and its Processes: Cases and Materials*, Eleventh Edition, continues in the tradition of its best-selling predecessors by providing students not only with a cohesive policy framework through which they can understand and examine the use of criminal laws as a means for social control, but also analytic tools to understand and apply important criminal law doctrines. *Criminal Law and its Processes: Cases and Materials* focuses on having students develop a nuanced

understanding of the underlying principles, rules, and policy rationales that inform all criminal laws. A cases-and-notes pedagogy along with scholarly excerpts, questions, and notes, provides students with a rich foundation for not only the academic examination of criminal laws but also the application of the law to real-world scenarios. New to the Eleventh Edition: Enhanced treatment of America's long-overdue reckoning with over-criminalization, mass incarceration, and discriminatory law enforcement Discussion of abolitionist critiques of American penal law and consideration of restorative justice as a possible alternative to traditional punishment The chapter on rape makes more readily understandable the major split between states that still require proof of some kind of force and those that now make absence of consent sufficient. The material also contains more depth for discussion of the increasingly

important question of what “consent” means, including several of the most recent cases and the new Model Penal Code provisions on rape approved by the ALI membership in June 2021. In-depth treatment of racial profiling and police use of excessive force, and a broader discussion of structural pressures and biases in the context of exploring the expansion of excuses Broader exploration of what society chooses to criminalize and prioritize for enforcement Updated notes to incorporate contemporary cases and recent news touching on criminal law Inclusion of additional preeminent cases in the field of criminal law, including: *Kahler v. Kansas* as a principal case in the material on the insanity defense Two new cases on the actus reus of conspiracy – the first in a drug distribution context and the second addressing Apple’s strategy for marketing ebooks on its iPad Professors and students will benefit from: Cohesive Intellectual Framework

- Donald A. Dripps 2013

This casebook provides the most comprehensive treatment available, including the theoretical foundations, the common-law origins, the statutory structure, and the procedural context of modern criminal law. The book concentrates on doctrinal materials that can support both rigorous technical, and sophisticated theoretical, discussions. The purposes and limits of punishment are addressed through Supreme Court decisions, a focus on statutes throughout the substantive law sections enables training students in the legal art of statutory interpretation as well as exposing them to the hard moral and political problems of legislative choice, and the sentencing materials reprise the theory of punishment in the context of the practically most

important stage of the modern process. The 12th edition carries forward the comprehensive approach of prior editions, empowering the teacher to design a course suited to the needs of the teacher's students and institution. New Supreme Court's decisions, changing the landscape of both substance and procedure, include *Skilling v. United States*, *McDonald v. City of Chicago*, *Graham v. Florida*, *United States v. Jones*, and *Michigan v. Bryant*. The material on self-defense has been comprehensively revised, both for the sake of clarity and to include discussion of so-called "stand your ground laws." Statutes (e.g., the New York and California homicide statutes) and the caselaw (e.g., up-to-the-minute material on "willful blindness") have been updated. We also now include a case about the admissibility of neuro-imaging evidence to support a diminished-capacity defense, thus acknowledging how modern brain science has begun to raise both practical evidentiary issues and a

substantial challenge to important theoretical p  
*Substantive Criminal Law* - Luis E. Chiesa 2014-08-14  
The strength of this casebook is the uniformity of each chapter's structure, which makes it easier to approach the chapter's topic systematically. Each chapter begins with several sections that discuss the applicable law, followed by a separate section that discusses the Model Penal Code's approach to the topic. This is then followed by a "Comparative Perspectives" section that encourages students to think about alternative ways of approaching the topic. The richness of the comparative materials used in the casebook is unmatched by its competitors, as many of the materials have been translated by the author. Finally, each chapter ends with a section titled "Scholarly Debates" that introduces the student to some of the philosophical discussions related to the topic.

This text, the only criminal law casebook authored by two progressive female law professors of color, provides the reader with both critical race and critical feminist theory perspectives on criminal law while following a traditional format. All of the usual subject areas are covered, but the book is unique in highlighting the cultural context of substantive criminal law. The book seamlessly integrates issues of race, gender, class, and sexual orientation so the teacher who wishes to address such issues does not have to assign supplemental reading assignments in order to do so. The book is also very student-friendly, providing a brief doctrinal overview of the subject matter at the beginning of each chapter.
